PROFILE

Full Stack Developer and advanced Information Systems student, with solid experience in Java and SQL. Passionate about UI/UX design and creating technological products that stand out for their “understandability” and accessibility for the end-user. Focused on building structured and scalable software; experienced in leading teams under agile methodologies and constantly learning, currently exploring the Salesforce ecosystem (working towards the “Platform Developer I” certification) and optimizing workflows. Proactive and results-oriented: when facing an obstacle, I research, learn, and design efficient solutions to achieve project goals.

EXPERIENCE & FEATURED PROJECTS

Full Stack Developer (Extension Project)
Asociación Asperger Argentina & UNLu

Luján, Buenos Aires
04/2026 - Present

- Gather requirements and plan the architecture to modernize the web platform, aligning the system with updated DSM-5 standards.
- Design and technically project the implementation of an interactive map with geolocation, allowing users to find specialized autism professionals nearby.
- Define the tech stack and development roadmap collaborating with an interdisciplinary team, focusing the product on accessibility and social impact.

Full Stack Developer & Project Creator
Simulador de Correlativas Académicas

Remote
02/2026 - Present

- Develop and maintain a SPA in React 19 with an automated rule engine for over 40 subjects, enabling real-time academic validation.
- Optimize project architecture using Custom Hooks, successfully reducing component complexity by 70%.
- Design an interactive onboarding and a PDF export engine (jsPDF) based on dynamic DOM states, prioritizing accessibility and understandability for the user.
- Implement data persistence with Web Storage API and a “State Snapshots” system to facilitate academic path testing without data loss.

Full Stack Developer & Lead
ConectAR-Dev

Buenos Aires (Remote)
08/2025 - 12/2025

- Led a 4-member team under Scrum methodology, managing the backlog and coordinating agile ceremonies to ensure milestone completion.
- Developed the MERN architecture and integrated external Mercado Libre and EmailJS APIs, expanding the marketplace’s operational and notification capabilities.
- Implemented a secure authentication system with database persistence, applying credential encryption with BCrypt and rigorous server-side data validations.
- Managed the application deployment on Vercel and designed an interface focused on accessibility and understandability for the end-user.

Research Intern
Universidad Nacional de Luján

Luján, Buenos Aires
03/2025 - 12/2025

- Systematized 41 academic documents in Zotero and normalized structured data using QID identifiers in Wikimedia.
- Evaluated 12 AI tools to optimize institutional data analysis processes.
- Delivered technical training on BARS, SJT, and BEI methods for the research team.

Java Developer
Final Exam (OOP) - UNLu

Luján, Buenos Aires
07/2024 - 11/2024

- Developed a LAN multiplayer desktop application of the UNO card game programmed in Java.

- Implemented the MVC pattern to separate business logic from presentation and modeled the system using OOP.
- Utilized the RMI library to separate business logic from the user interface, achieving a Client-Server system.

EDUCATION

Universidad Nacional de Luján, Luján, Buenos Aires

03/2022 - Present

Bachelor's Degree in Information Systems (Third year)

TalentoTech & Salesforce, Remote

In progress

Salesforce Developer (Platform Developer 1 Route)

- 12-week intensive training with technical mentoring. Ranked at the top of the cohort for the official certification sponsorship (80% completed).
- Develop business logic and automations with Apex (Triggers, Callouts), SOQL, and Flow Builder, integrating modern interfaces with Lightning Web Components (LWC).
- Solve high-difficulty Superbadges on Trailhead, reaching the Mountaineer rank with over 45,000 points and 55 badges.

Fundación Pescar, Educación IT, L'Oréal & Fundación Karuna, Buenos Aires (Remote)

08/2025 -

03/2026

Intensive Bootcamp: Full Stack Web Developer (MERN)

- 301 total hours of training.
- Full Stack Web Development Training: HTML5, CSS3, JS, Git, MongoDB, Node.js, ReactJS, and OOP (220 hrs).
- Soft skills training (81 hrs).

TECHNICAL SKILLS

Languages & Backend:: Java, JavaScript, Node.js, Express.js, Python, Apex (Salesforce), C, Assembler

Frontend:: React 19, Lightning Web Components (LWC), Tailwind CSS 4, Vite, HTML5, CSS3

Databases:: MongoDB, PostgreSQL, SOQL, SOSL

Architecture & Testing:: REST APIs, MVC, Object-Oriented Programming (OOP), JUnit

Tools & Deploy:: Git, GitHub, Linux (Mint), Vercel, Netlify, Postman, BCrypt, Trello

Salesforce & Methodologies:: Salesforce Flow Builder, Agentforce, Scrum, Agile Methodologies

LANGUAGES

Spanish (Native), English (Intermediate B1/B2)
